IN THE ABSTRACT OF THE DISCLOSURE

Please delete the original Abstract and replace it with the following:

--A communication system including a first apparatus having a first storage medium, and a second apparatus for transmitting data to the first apparatus. The second apparatus has a second storage medium for storing management information of data to be transferred to the first storage medium, a communicator for communicating data with the first apparatus, an editor capable of editing the management information and a controller for making a control to transfer data stored in the second storage medium to the first storage medium by way of the communicator based on the management information edited by the editor.--

IN THE CLAIMS

Please amend claims 1-25 by rewriting same to read as follows.

--1. (Amended) A communication system including a first apparatus having a first storage medium, and a second apparatus for transmitting data to said first apparatus,
